ABOUT ME

Software Engineer with 2.5+ years of experience building scalable full-stack applications using Java, Spring Boot, Microservices, React.js, Next.js, and AWS. Skilled in designing secure REST APIs, optimizing performance, and delivering cloud-native, production-ready solutions in Agile environments.

SKILLS

- Spring Boot
- Spring MVC
- Hibernate
- REST APIs
- React.js
- Next.js
- MySQL & PostgreSQL
- Microservices
- AWS EC2/S3
- JWT

PROGRAMMING LANGUAGES

- Java
- Python
- JS

TOOLS

- Git and Github, Vercel
- AI tools: Claude, Cursor, etc..
- StoryBook, Jest, Cypress

EDUCATIONS

Bachelor of Technology in Computer Science

DBUU Dehradun, 2025
CGPA obtained: 8.3 CGPA

Intermediate in PCM

GIC Gangabhogpur, 2021
Marks obtained: 448/500

ACHIEVEMENTS

- INSPIRE Award 2021 – Uttarakhand Board
- Hackathon Participant – DBUU (2023)

EXPERIENCES

SOFTWARE ENGINEER

Present-2025

Brainstrata, London, UK

- Built responsive and reusable user interfaces using React.js and Next.js, integrating RESTful APIs to deliver real-time dashboards and content management solutions.
- Improved development efficiency by ~25% by building a reusable React component library
- Enhanced application performance with lazy loading, image optimization, and code splitting while actively participating in Agile-based development, testing, and release cycles.
- Link: <https://brainstrata.com/>

JAVA DEVELOPER

2023-2025

CSKAA, Noida, India

- Developed and deployed scalable RESTful APIs using Spring Boot, integrating backend services with frontend modules to deliver secure and efficient production-grade applications.
- Implemented authentication and authorization using Spring Security and optimized database queries, improving application performance, security, and API response times.

PROJECTS

DocuMind: An AI-Based document analysis

<https://documind.xadisri.in>

Tech Stack: Spring Boot, OAUTH2.O, AWS EC2/S3, PostGreSQL, Next.js, Tailwind, Vercel, REST API

- Built an **AI-powered** Document Intelligence platform enabling automated document analysis, data extraction, and intelligent insights generation.
- Developed secure and scalable **REST APIs** with **OAuth 2.0** authentication, supporting document processing using **Open Router API**, storage(**S3**), and workflow automation.
- Deployed cloud-native solutions on **AWS** and engineered responsive user interfaces with **Next.js** and Tailwind CSS for seamless user experience.

MEDAI – AI-POWERED HEALTHCARE APPLICATION

<https://github.com/gptaditya/MedAI>

Tech Stack: Spring Boot, Spring Security, Python, ML, MySQL

- Developed an **AI-driven healthcare platform** for disease prediction using machine learning models and symptom-based analysis.
- Built secure **REST APIs** and implemented **Spring Security**-based authentication to support patient management and online consultation workflows.
